ISO 9001:2015 Quality Management System

ISO 9001 is also called as a complete business standard that reduces various risks, enhances overall profitability and also strengthens relationship with all customers. Implementation of management system w.r.t. ISO 9001 standard requirements develop every organization, small or big, a profit making centre in long run.

ISO 13485:2016 Medical Devices - Quality Management System

ISO 13485 specifies requirements for a quality management system where an organization needs to demonstrate its ability to provide medical devices and related services that consistently meet customer's as well as applicable regulatory requirements. These requirements are specific to organizations regardless of the type and size. Compliances w.r.t. Statutory & Regulatory requirements are important too.

ISO 14001:2015 Environmental Management System

ISO 14001 is applicable to all types of organizations. It is developed to adapt various geographical, cultural and social conditions. Focus of this management system remains on reducing consumption of natural resources. Ultimate aim is to eliminate or reduce existing and potential adverse effects on environment occurring from respective business processes.

BS ISO 45001:2018 Occupational Health and Safety Management System

ISO 45001 is an occupational health and safety management system standard that promotes safe and healthy working environment within organization at all levels. This management system enables an organization to prevent potential risk from occurrence, thus preventing potential losses.

ISO 22000:2018 Food Safety Management System

ISO 22000 applies to any organization, either involved in food production, storage or in supply chain. Objective behind implementation of Food Safety Management System is to prevent food hazards and ascertain best quality till its consumption. This standard also enhances organization's social image and generates confidence in business.

CE Mark Product Certification

CE mark is a mandatory conformity marking for certain products sold within the European Economic Area (EEA) since 1985. The CE marking is also found on products sold outside the EEA that are manufactured in, or designed to be sold in, the EEA. This makes the CE marking recognizable worldwide even to people who are not familiar with the European Economic Area.

Customer Friendly Approach

All our audit team members are thorough professional and well conversant with respective business processes. We pay utmost priority to ensure that our customer is not only maintaining compliance but their performance is also enhanced in every area of business. Our auditors shall always help to achieve your targets through their ideas and innovative solutions. Our prompt and value added service to every customer developed strong relationship among us. "Customer Delight" is our permanent objective.
